# POS SOFTWARE

that understands you...

From people who

**UNDERSTAND POS!**

**LOGIVISION** strives to create superior point of sale software that provides secure transaction registration and efficient data analysis for our customers in the retail industry. We believe that superior quality in our products and services creates solid relationships with our business partners and guarantees our continued growth and success.

# Improve your check-out operations with **LPOS**

## **What makes a point of sale system work in your store?**

It's hard to find the POS system that suits your business. Adopting the right POS will become one of your best business decisions. A POS should help you reduce manual entries and mundane tasks to provide you with more time and freedom for other activities.

**LPOS** is an easy to use, easy to manage point of sale system designed specifically for retailers seeking rapid transaction entry and secure data recording. **LPOS** includes all the tools you need to design entry screens, manage peripherals and interface with the back-end application. **LPOS** improves operations in all types of fast retail including supermarkets, c-stores, liquor stores, specialty and general retail.

# LPOS

- PCI Compliant integrated & semi-integrated payment options
- EMV ready
- Cashier monitoring
- Interface to Digital Video Recording software
- Hardware and peripherals management
- Security levels to control access
- Electronic journal for audit trail
- On screen advertising
- Line Busting
- Personalized screen layouts
- Hot key items, flip charts and scanning items
- Training mode
- Mobile checkout counter
- Gift cards
- Gas pump interface

# EASY

Focus on your service with an easy-to-use software like **LPOS**.

## **Are your employees offering high quality service to your clients?**

Help them engage eye contact with your customers instead of wasting time trying to process transactions. **LPOS** will help you spend time managing your business and not assisting your employees at the checkout counter.

Search for a system that will suit you because your business is unique. **LPOS** is customizable and will help eliminate repetitive tasks to simplify your operations. Make sure you can design your POS to make it intuitive. Then your employees can figure out the basics easily without your assistance.

Offer a

**FAST**

and enjoyable client experience  
with **LPOS**.

### **Do your customers leave your store with a smile on their face?**

The last experience your customers have is the checkout and payment process. You can make a great impression on them by speeding up the checkout. No retailer likes to see a cart abandoned and lose a customer forever. Long checkout lines directly impact your sales and result in lost revenue.

**LPOS** is fast and allows cashiers to ring up items rapidly. It must accept quick forms of payment like debit and credit to reduce time spent manipulating cash. Can your POS be configured to minimize the number of steps and reduce the transaction time? Who doesn't want to serve more customers in less time? And what about line busting devices that can speed up queue traffic? And while they are waiting to pay you may want to consider using **LPOS** screens to display ads and images that will promote your business to them.

# SECURE

your business with **LPOS**.

## **Worried about security?**

**LPOS** keeps tight control over your front-end operations and allows cashiers and clerks to use the software securely. **LPOS** restricts operations and allow you to implement user level permissions. **LPOS** interfaces to the proper hardware for scanning or weighing products. Of course you need a point of sale to print the right items on the cash receipts and store your information in a secure audit trail. **LPOS** will help you track down the data when you need it.

The retail industry has experienced an alarming number of data and security breaches that have resulted in the loss of millions of customers' credit cards and personal information. It is important to make sure that your POS meets the required regulations and policies for accepting credit cards like **LPOS**.

***KEEP TIGHT CONTROL***

## **Do you feel that your work days are a constant race against the clock?**

Running a business is complex. From inventory purchases, running price promotions, staff training, end of day consolidation to all the other responsibilities that lead to your bank deposits: as a retailer you end up having a lot on your plate. Trying to achieve everything manually or all alone is going to drag down the success you deserve.

Using a back-office system like **L-BOSS** becomes a necessity. You need to store all your product, employee and customer information securely. A POS back-end engine needs to compile your data on the fly. It's important to have access to up to the minute sales data at all times, not only after complicated end of day processes required by many systems. **L-BOSS** will help you analyze what's happening in your store any time during the day so you can forecast what's coming next.

## LBOSS

- Product maintenance and price modeling
- Promotional batches
- Real-time exchange keeps things up-to-date
- Integrated report builder
- Automatic backups
- Transaction search & review
- Employee time clock
- Basic rental tracking
- Cashier and safe balancing
- Transfer data to accounting packages
- Automatic update system is available

Find the right stock balance doing

# INVENTORY CONTROL

## Can you afford losing a customer because you run out of an item?

When a client is in your store, he needs to find what he is looking for and leave with a smile on his face. **L-BOSS** will help you manage your inventory to ensure sufficient stock levels, keep track of orders and validate that your suppliers are delivering the right products at the listed price.

Your stock is your potential income and recording your inventory level with **L-BOSS** is important. Knowing how much you have will help you monitor your losses. It will help prevent inventory shrinkage due to shoplifting, employee theft as well as damaged goods or spoilage.

- Stock control & average cost valuation
- Ordering, receiving and store counts
- Inter-store transfers for multi outlet retailers
- Mobile device for price verification and receiving
- Print price labels & shelf tags

Manage, engage and  
reward your

**CUSTOMERS**

## **Do you really know your customers?**

They are the most important people in your business and managing them is important. One of the biggest challenges that retailers face is to acquire new customers. And then there is the bigger challenge of convincing them to come back. Consumers' expectations are really high because information is omnipresent and their profile is constantly evolving.

**L-BOSS** can act as a hub of valuable client information and allow you to collect basics like age, address, gender and purchase activities.

**L-BOSS** is a great tool to help you know your customers so you can create the appropriate offers.

- Manage risks with credit and check limits
- Track account balance, charges and statements
- Manage privileges with discounts and price levels
- Track item purchases per client
- Implement product reward programs
- Earn and burn point system

# CENTRALIZE

your efforts with **L-BOSS**

Your business is blooming and you're worried your work load will expand exponentially. Growing your business should be an exciting challenge. When choosing your POS, make sure that the system is able to support multiple outlets the way **L-BOSS** will.

**L-BOSS** manages remote store data communication which means you can manage things from your central office. L-BOSS will be there as you grow that single store into a 5 store chain or the 5 stores into hundreds of locations.

- Data exchange with headquarters
- Retrieve sales information from stores to central system
- Push product, customer and employee data from Central to target stores
- Transfer products between stores

***GROWING YOUR BUSINESS***  
*should be an exciting challenge!*
